

CARELIKA

PROFESSIONAL SKIN CARE

MESOTHERAPY

CARELIKA PROFESSIONAL STERILE AMPOULES

This is a modern line of sterile cocktails for aesthetic medicine and professional cosmetology, created to address key skin concerns in the practice of dermatologists and cosmetologists.

Each formula is developed on the basis of clinically significant actives in therapeutic concentrations: nucleotides (DNA, RNA, NAD+), exosomes and stem cells, tranexamic acid, glutathione, vitamin C. These ingredients represent the most promising directions in modern cosmetology - **longevity, antioxidant protection, depigmentation, biorevitalization, and cellular energy.**

EXOVITAL COMPLEX

Deep regeneration and anti-age care.

TXG COMPLEX

Depigmentation and even skin tone.

LUMIDERM COMPLEX

Antioxidant protection and radiance.

NAD+ COMPLEX

Cellular energy and next-generation rejuvenation.

BENEFITS OF CARELIKA AMPOULES

- Sterile formulas - safety and suitability for use in aesthetic medicine.
- High bioavailability and active penetration into the deep skin layers.
- Compatible with device-based and injection procedures (microneedling, laser, needle-free mesotherapy).
- Versatility - applicable in anti-age, depigmentation, revitalization, and restorative protocols.

WHEN THEY CAN BE USED:

- In mesotherapy protocols (classical, fractional, needle-free mesotherapy).
- In combination with device techniques: microneedling, lasers, RF-lifting, ultrasound.
- In post-procedure care to accelerate recovery after aggressive interventions.
- In treatment programs for hyperpigmentation, chrono-aging, dullness, and skin thinning.

CARELIKA ampoule line - offers ready-made solutions for professionals, enabling personalized care and the creation of protocols of any complexity - from basic revitalization to premium anti-age treatments.

CARELIKA STERILE COCKTAILS

- Undergo filtration sterilization
- Free from fragrances, silicones, dyes, and preservatives
- Contain only sterile active ingredients
- Suitable for invasive procedures
- Safe for sensitive and reactive skin
- Developed for professional use
- Manufactured in Spain

CARELIKA STERILE COCKTAILS

CARELIKA EXOVITAL COMPLEX

EXOVITAL COMPLEX is a bio-restorative formula designed to correct deep wrinkles and improve skin hydration.

It stimulates skin metabolism, leaving it firm and healthy-looking.

SODIUM DNA - stimulates cell renewal and collagen synthesis.

HYDROLYZED DNA + RNA - accelerates cell renewal and activate restoration.

SODIUM HYALURONATE - hydrates the skin, improves firmness, smooths wrinkles.

ROSA CENTIFOLIA LEAF CELL EXTRACT - reduces inflammation, enriches the skin with antioxidants.

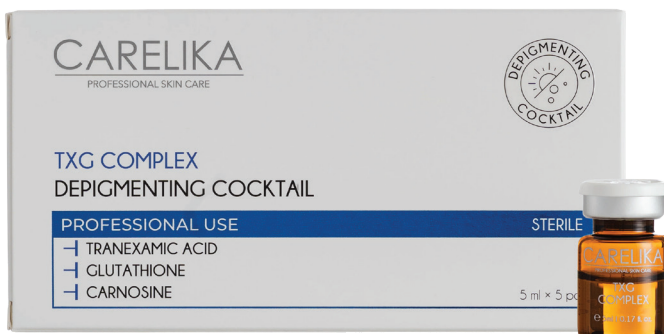

CENTAUREA CYANUS CALLUS LYSATE EXTRACT - protects against external aggressors, strengthens capillaries.

RECOMMENDED FOR:

Patients with loss of skin tone and signs of aging.

Skin recovery after aggressive procedures.

Premium-level anti-age protocols.

CARELIKA TXG COMPLEX

TXG COMPLEX is a professional cocktail designed to brighten the skin and correct pigmentation, including melasma and post-inflammatory spots.

It helps even out skin tone, strengthen capillaries, and protect against oxidative stress.

TRANEXAMIC ACID - brightens pigmentation, inhibits melanin synthesis, strengthens blood vessels.

GLUTATHIONE - antioxidant, protects cells from damage, gives skin radiance.

CARNOSINE - combats glycation, slows down skin aging.

CITRIC ACID - regulates pH, supports gentle skin renewal.

SODIUM CHLORIDE - maintains balance and supports distribution of ingredients.

RECOMMENDED FOR:

Patients with hyperpigmentation, melasma, post-inflammatory spots.

Skin after acne with uneven tone.

Prevention of photoaging and seasonal spots.

CARELIKA STERILE COCKTAILS

CARELIKA LUMIDERM COMPLEX

LUMIDERM COMPLEX is an antioxidant formula for skin radiance and protection.

It combats oxidative stress, evens out skin tone, and gives the skin a fresh appearance.

GLUTATHIONE - antioxidant, protects cells, inactivates tyrosinase, reduces pigmentation.

VITAMIN C - powerful antioxidant, stimulates collagen synthesis, brightens the skin, and enhances radiance.

RECOMMENDED FOR:

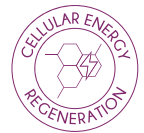

Patients with dull, tired skin.

Urban skin exposed to stress and environmental factors.

Anti-photoaging protection programs.

CARELIKA NAD+ COMPLEX

NAD+ COMPLEX is an innovative formula for restoring cellular energy and prolonging skin youthfulness.

It stimulates metabolism, strengthens DNA, and improves firmness.

SODIUM DNA - stimulates cell renewal and collagen synthesis.

RNA (HYDROLYZED RNA) - accelerates tissue regeneration and activates cellular metabolism.

NAD+ - boosts ATP energy production, protects DNA, supports longevity effects.

RECOMMENDED FOR:

Patients with pronounced signs of chronological aging.

Mature, thinning skin with loss of firmness.

Longevity and anti-age programs 40+.

CARELIKA MICRONEEDLING SYSTEM

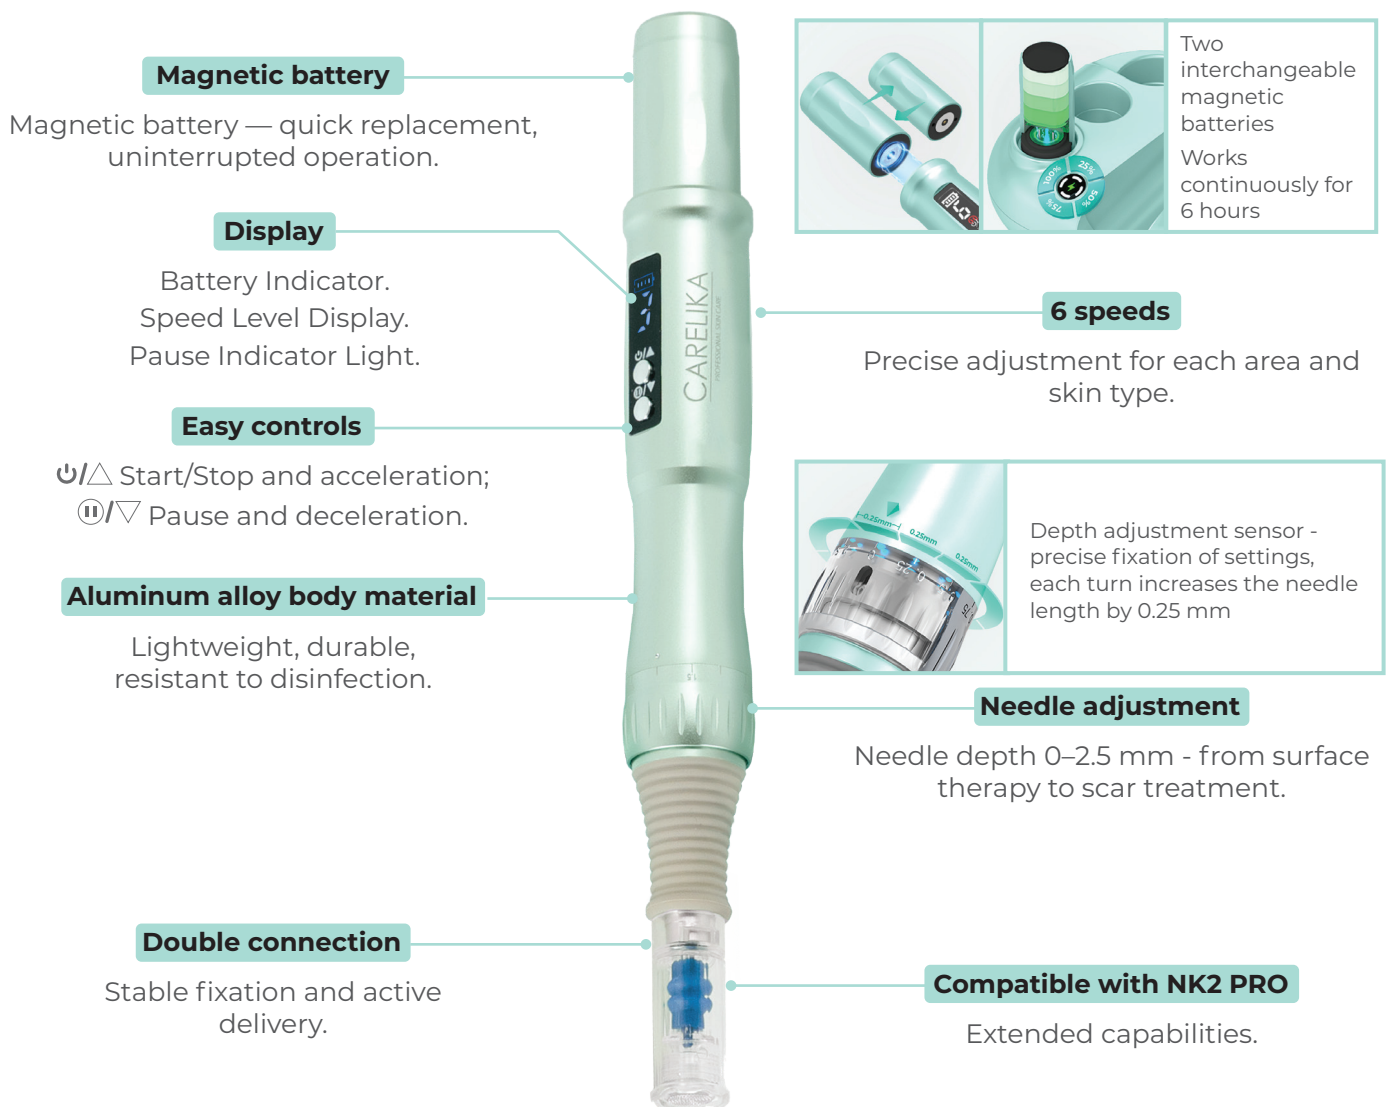

We offer a **modern and safe approach to skin microtherapy**, combining:

- Professional MicroNeedle Pro.
- Innovative cartridges.
- Sterile active cocktails.

The system is designed to deliver clinically significant results with minimal skin trauma.

CARELIKA devices and formulations adapt to individual skin needs and expand the possibilities of aesthetic procedures.

CARELIKA MICRONEEDLE PRO

CARTRIDGE NK2 PRO

Next-generation cartridge – safety and efficiency

11 needles

Wrinkles and scars.

16 needles

Lifting and firmness.

36 needles

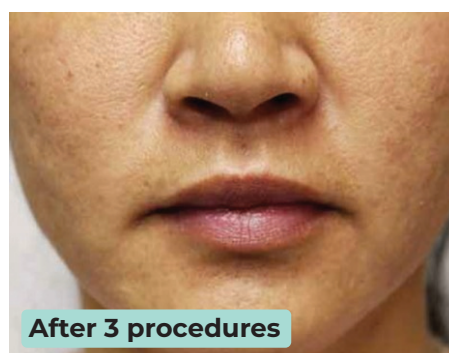

Pigmentation and melasma.

- Double sealing
- Waterproof
- Zero loss: 100% serum delivery
- Medical-grade steel
- Needles from 0.15 mm
- 2-point bayonet connection
- Dual spring technology
- Anti-backflow system
- Relief-shaped base for gentle contact

INSTRUCTIONS FOR USE

1		Disinfect the cartridge.	4		Turn on the device.
2		Insert the cartridge.	5		Perform skin treatment.
3		Select the needle length.	6		Twist to remove the cartridge.

EFFECTIVENESS

Result:

Even tone, reduced pigmentation, smoothed wrinkles, gentle moisturization.
